schools. Share your  
ideas beyond  
positions

Facebook post from DAV Public School, Sreshtha Vihar, Delhi. The post includes a profile picture of the school, a cover photo of a school building, and a main text block. The text describes a session where Class IX students, guided by Mr. Kazuya Numata, Vice Principal of Doshisha Junior High School, Japan, designed architectural improvements using paper folding. It also mentions a discussion by Madam Principal Mrs. Premlata Garg about connecting with students of Doshisha High school and DAV, Sreshtha Vihar.

Students of Class IX at DAV Public School, Sreshtha Vihar had an excellent opportunity to have hands on session under the guidance of Mr. Kazuya Numata, Vice Principal, Doshisha Junior High School, Japan. Our students devised architectural designs by using paper folding activity and also designed wind propeller, and were provoked to think upon the architectural improvements in design by the Japanese teacher. This was the second time when Mr. Numata visited DAV, Sreshtha Vihar, to forge relationship between the two countries. Madam Principal Mrs. Premlata Garg also discussed the possibilities of connecting with students of Doshisha High school and DAV, Sreshtha Vihar.
